### About the Course

The OTHM Level 7 Postgraduate Diploma in Health and Social Care Management develops a strong understanding of policy, management theory, and practice in the sector. It helps learners address challenges faced by professionals, service users, and policymakers. The program blends theory and practice, focusing on skills like leading change, improving performance, strategic planning, and team leadership, equipping learners to manage effectively in healthcare settings.

# Qualification Structure

→ This diploma consists of 6 mandatory units for a combined total of 120 credits, 1200 hours Total Qualification Time and 600 Guided Learning Hours for the completed qualification.

- Health and Social Care Leadership
- Managing People in Health and Social Care
- Managing Finance in Health and Social Care
- Health and Social Care Strategies and Policies
- Leading Change in Health and Social Care
- Research Methods for Healthcare Professionals

## Key Features

The diploma equips learners for a variety of roles in healthcare administration and management, including positions in hospital management and social care facility oversight. It offers pathways to new job opportunities and career progression while also facilitating further academic pursuits, such as a Master's program with advanced standing. With the skills and knowledge gained, learners are well-prepared to make impactful contributions to the health and social care sector and thrive in leadership positions.

## The Units

### → Health and Social Care Leadership

This unit aims to give learners a deep understanding of leadership theories and styles, enabling them to assess leadership roles and apply appropriate approaches.

### → Managing People in Health and Social Care

This unit helps learners understand recruitment, management, and staff development in health and social care, focusing on hiring, retention, training, and managing workplace diversity.

### → Managing Finance in the Health and Social Care Sector

This unit introduces key financial concepts for managers in health and social care to support informed decision-making within legal frameworks.

### → Health and Social Care Strategies and Policies

This unit explores international health and social care policy, focusing on contemporary issues that shape national and global healthcare strategies.

### → Leading Change in Health and Social Care

This unit covers change management theories and models, their application in global organizations, and perspectives on evaluating and improving service quality in health and social care.

### → Research Methods for Healthcare Professionals

This unit develops skills in research approaches, proposal formulation, planning, data analysis, and linking research to practice.

## Entry Requirements

→ For entry onto the OTHM Level 7 Postgraduate Diploma in Data Science qualification, learners must possess:

- An honours degree in related subject or UK level 6 diploma or an equivalent overseas qualification
- Mature learners with management experience (learners must check with the delivery centre regarding this experience prior to registering for the programme)
- Learner must be 21 years old or older at the beginning of the course
- Evidence of English language competency (if a learner is not from a majority English-speaking country)
